If you are a busy manager or business owner who needs quick access to key business information in a format that is easy to read and understand, Business Insights for MAS 90 and MAS 200 is the ideal solution. Designed to provide the data you need to make critical decisions, Business Insights presents information in a high-level, attractive graphical format that allows you to instantly ascertain the state of your business. Flexible, yet simple to use, Business Insights is displayed within the MAS 90 or MAS 200 Launcher and can also be accessed directly with Microsoft Internet Explorer, Outlook or Digital Dashboard.

Business Insights provides timely and efficient access to accurate financial information generated from your MAS 90 or MAS 200 system. You can keep on top of critical business management information and be better prepared to thrive in today's fast-paced, highly competitive business environment.

With Business Insights, you decide what information is the most critical to your operation. You may select up to 12 key reports to include on your Business Insights start page, the order in which the information appears, and how much detail is displayed.

Business Insights gives you the information you need to make better business decisions and it helps you conduct your day-to-day operations with higher levels of efficiency. Your customized start page delivers the data you need most when you need it. Staying informed has never been easier!

FEATURES

Customizable Start Page Configuration	A wizard makes it easy to customize your start page and select the reports you want to see. For example, variable pie chart graphs and their table elements can display sales for your top five, 10 or 20 customers, depending on what is most appropriate for your company.
Easy Access to Information	View your information within the MAS 90 or MAS 200 Launcher or access it directly with Internet Explorer.
Extensive Drill-Down Capabilities	You have the option to drill down into selected MAS 90 or MAS 200 reports and inquiries to display additional information.
Attractive Text and Graphical Data Displays	The easy-to-read information display uses a combination of visually effective text and graphics in an attractive, contemporary design.
Automatic Data Refreshing	Data is automatically refreshed through a polling process that takes place in the background. This ensures the display of up-to-date information without having to take the time and effort to manually refresh data. You have the ability to refresh when launching Business Insights, or you may specify a time value for automatic data refreshing.
